Is the glass half full or half empty speech. Is the glass half-empty or half-full. Is the glass half empty or full answer. Is the glass half full or half empty funny answers. Is the glass half empty or half full essay.

I am never disappointed.-- Olemurder 22:32, December 10, 2005 (UTC) [Reply] Glass is not half empty or half full, it is being and nothing. When I say the glass is halfway, I'm realistic. The same, or rather the opposite, applies to a pessimist. The empirical answer will depend on how most people prefer to name glass, and when they do so. 00:52, 3 February 2006 (UTC) [Reply] There is no correct answer to the question. It is a means to show that some situations can be seen in different ways, that there can be a silver lining in the storm cloud. So, the glass is half full, because it's just half of one, which is equal to 0.5. It can't be half-empty because half-empty is equal to half of zero which is equal to zero. If there is an answer so it does not matter - the question it poses is an idiomatic term, and as such it does not rely on the answer to have its necessary effect. Damn it, I'm depressed now. WikilaCkey 02:57, December 9, 2006 (UTC) [Reply] Never mind, you can always reload --: D- - Djith 02:04, December 25, 2006 (UTC) [Reply] depends - the way I see it, if you put things in the glass is half full, but if you're pouring the liquid is half empty. I'm sorry for anyone who wrote it before.-- Olemurder 21:17, 17 Mar 2005 (UTC) Obviously the real answer is that glass is twice as big as needed.-- Anonymous user. Grutness... wha? Case closed. Personally, I say an optimist is beautiful. It means nothing to me if I'm trying to be a realist. If the content is undesirable the scenario (half full) could be considered pessimistic and the scenario (half empty) optimistic. The idea that people use this expression are totally ridiculous to listen. No one ever cares if a particular glass is half full or half empty. Not because I'm pessimistic, but "because the glass was not before the water came, O'CURSE! The "native native natives" of oxygen glass, as "empty" are often alone, air" (a) (a) The road, note, are not optimistic even ... I am realistic. Both convey exactly the same information. The previous comment not signed added by 151.145.232.91 (TALK Á ě á -~ á á ě contributions) Recovered by " = 1034546883 "I think for me, the point here is to establish which type of person is more likely to be with optimistic or pessimistic. Just solved. This article reads as one of those jokes that I continue to take my email. The term "full half" is the most appropriate. It makes sense to define blank how to have a value of zero and full like having a value of one. WoW point of view Read your different point of view about half full or half blank. In reality, they are both denotically correct, but they could be, as previously declared, connotively different. They think there is only the left half until it went everything. Á ě á -~ "Á ě á -~ 0 04:37, 8 June 2007 (UTC) [Reply] The Law of Cosby My favorite answer comes from a Bill Cosby Graduation address. A better way to use the term "half empty" is to say that glass is "a way to be empty". Go ahead! --84.249.253.201 15:20, 19 February 2007 (UTC) [Answer] Optimist vs. Literature on psychological phenomena Called "Corning" studied this cannot be an empirical response (observable and measurable) because there is no glass. - Isto 06:31, 27 March 2006 (UTC) [Answer] There is a reply philosophical and an empirical response. I find it obvious that the correct answer is yes. It simply is a 50/50 situation that the people demonstrated to make me feel positive and yet fail to let me know that it is still 50/50 unfolds mine perspective. - Isto 01:04, 30 December 2005 (UTC) [answer] technically, there is a correct answer to the question, but it varies from case to (and Á - now provided in the article). OooooOOHHHHH Shnap -Anonymous is half full and this is mathematically tried James's pessimism rejection The glass content can change the entire perception of demand and response. Realism and science is the only way to live life. Nweithal nor the best way to say is that the glass is just half. A glass should be filled. Guess what? Personally I say that it is half full because it is more short and easier to say. The point is that the answer is more a matter of points of view than of empirical experience. She asks her as she asked him what she learned at school and he tells her that at the course of philosophy they spent all day to discuss if the glass was half-empty or half full. It is annoying to hear it. So if you have a bit of water to fill ... in any case, the chance to recognize the glass just like Á «MetÁ Á» should be discussed in the article, since it is also applicable to life real. If the water has been brought to half road, it is half full; if it was lowered, it's half empty. Of course, due to evaporation the level of water always lowers, so I suppose that technically it would be a blank in any case. It is a rigorously rhetorical used hypothetical glass. Please don't try to add á ě €The response "saying that it is always half full or that is half full if it was empty before it was empty if it was full. I am convinced that it is pure psychological madness and I would like people respect my philosophy. It is a philosophical question, not empirical. Bunthome 05:29, 17 November 2006 (UTC) [Answer] I never understood the rhetorical value of the application empty/half full, since the response depends on the initial volume of the glass first .cetasnep .etasnep asoc erepas imetaF .
